Fall protection standards have changed, and with Cal/OSHA's 6-foot trigger height now in effect, understanding how to prevent falls is more important than ever. We're hosting a free, in-person event to help you understand the new standard. You'll have the opportunity to learn directly from Cal/OSHA and State Fund fall prevention experts as you navigate the important changes.

Equipment vendors Honeywell, Metal Tech, Werner, Garlock, Milwaukee, and Grainger will also be on hand to showcase fall prevention equipment and to answer your questions.

We will cover

- The current trigger heights for different trades
- How to properly identify the fall risks and implement fall protection at your workplace
- How to plan and train for those risks and provide the appropriate equipment
- The annual National Safety Stand-Down event which educates employees in fall and other job hazards and how you can deliver your own event
- Find out if you qualify for **free** safety equipment
- And much more...

Our seminars are free and open to all California employers and insurance brokers. **This event features a 90-minute presentation plus a Q&A session and time with the equipment vendors.**
